ReceivePay Card Processing

Process Payments Quickly and Easily with ReceivePay

Integrate your payment processing and accounting activities into one simple solution

Process Payments Directly from QuickBooks®

ReceivePay Card Processing installs as an plug-in to your existing QuickBooks accounting software, allowing you to seamlessly integrate your accounting and payment processing activities into one simple solution. Receive instant payment on invoice, print receipts, and research transactions and payment history - all within QuickBooks. Integrations include MyVirtualMerchant, Converge and Authorize.net gateways.

Get Paid Quickly - NextDay Funding

ReceivePay Card Processing offers your customers more ways to pay and expedites payment through electronic delivery. Real-time processing provides instant payment status, ensures timely payment, and reduces unpaid invoices.

Save Time and Money

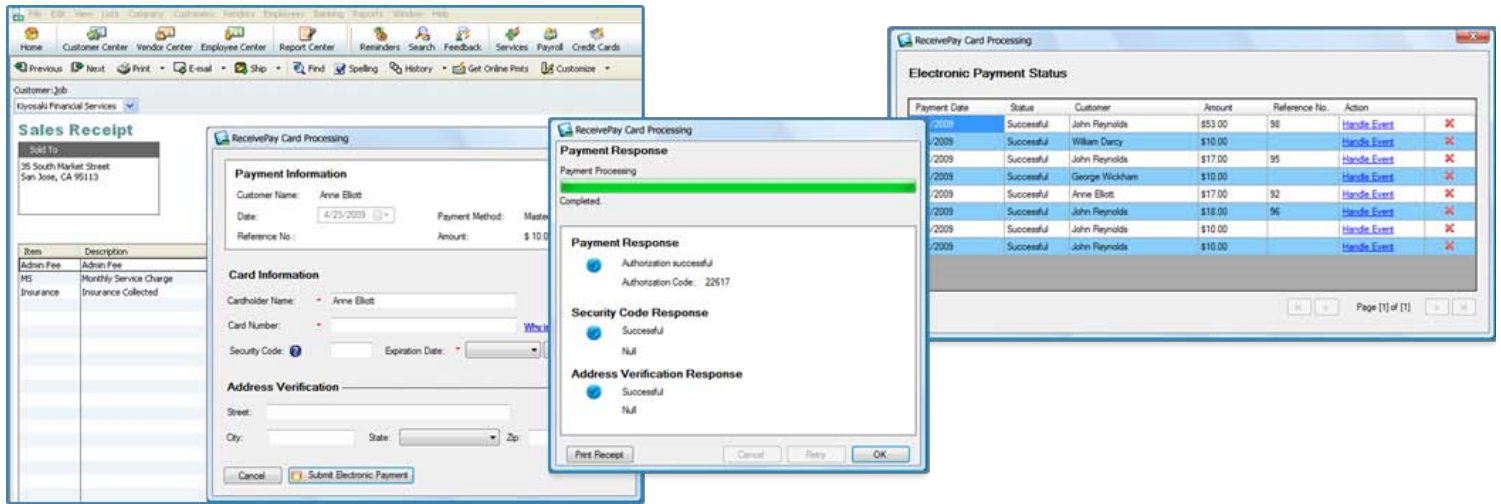

ReceivePay Card Processing dramatically increases your efficiency, while saving countless hours of payment collection, data entry, and accounting time. Process payments in real-time, automatically update accounting records, and eliminate trips to the bank and post office.

Grow Your Business

ReceivePay Card Processing consolidates daily business activities into one simple solution. The result? You'll spend less time managing accounting tasks and more time growing your business. Accelerate receivables to improve cash flow, reduce borrowing, and increase investments.

ReceivePay Tools Simplify Daily Business Activities

1. Simply enter data into the Payments Details screen and click to Authorize.
2. Transactions are securely authorized using your internet connection so you receive transaction details right away.
3. Transactions automatically post to QuickBooks where you can easily research and manage accounts.
